

Dear Students,

“Information Technology always changing, continually challenging to learn and update new technology and that’s amazingly rewarding”

Welcome to the Department of Information Technology at Shri G.P.M. Degree College. The primary goal of our Information Technology Department is to give the best IT infrastructure, enhanced learning environment to make the learning interest of the students, acquire industry practices through industry collaborations and enhance moral and ethical values.

Our mission is to develop Information Technology Professionals with strong fundamental concepts, analytical and problem solving skills using high level programming languages with vast exposure to emerging technologies. And to enhance the leadership qualities of the students to serve the society with ethical values.

In our Information Technology Department, industry-trained experienced professors are teaching to give the best programming knowledge and to produce trained students in the field of Information Technology to compete in the Information Technology world.

Our department students are highly motivated to understand the dynamics of the industry needs and upgrade their programming skills accordingly. The opportunity for the Information Technology Students is vast.

Information Technology (IT) field allows students to select their career in a number of different directions. Become a Software Developer, a Computer Network Architect, a Database Administrator, a System Analyst, an Information Security Analyst, an Information Architect, a Web Developer and so on. Our students that stay on top of the latest technology trends will have many career options to select from.

Our approach is a student centric teaching-learning process, a team work approach to prove themselves in their field. That’s why our G.P.M Degree College Students are shining in the Information Technology World.

Dr. G. Justy Mirobi
